## EDUCATION

|                                                                                                              |                                               |
|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| <b>Institute of Aeronautical Engineering, Hyderabad</b><br><i>B.Tech in Computer Science(Cyber Security)</i> | Expected Graduation-2027<br><i>CGPA: 8.71</i> |
| <b>SriChaitanya Jr College</b><br><i>Intermediate</i>                                                        | 2021 - 2023<br><i>Score: 950/1000</i>         |
| <b>Sanghamitra School</b><br><i>SSC</i>                                                                      | 2011 - 2021<br><i>Score: 441/500</i>          |

## TECHNICAL SKILLS

|                         |                                                              |
|-------------------------|--------------------------------------------------------------|
| <b>Languages</b>        | Java, Python, Javascript, SQL                                |
| <b>Web Technologies</b> | React.js, Node.js, Express.js, HTML, CSS                     |
| <b>Databases</b>        | MySQL, MongoDB                                               |
| <b>AI/ML</b>            | Prompt Engineering, LLMs, RAG, Machine Learning Fundamentals |
| <b>CyberSecurity</b>    | OWASP Top 10, Burp Suite, Nmap, Wireshark, Metasploit        |
| <b>Version Control</b>  | Git, GitHub                                                  |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                       |                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Institute of Aeronautical Engineering</b><br><i>Summer Research Intern</i>                                                                                                                                                                                                                                                         | April 2025 - May 2025 |
| <ul style="list-style-type: none"><li>Designed and implemented a penetration testing framework, executing the full five-phase testing methodology using tools like Nmap, Nikto, enum4linux, and Metasploit, and developed a CVSS-based vulnerability scoring model to prioritize threats and improve risk-based mitigation.</li></ul> |                       |

## PROJECTS

|                                                                                                                                                                                                                                                                                                            |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>AI College Helpdesk Agent</b>                                                                                                                                                                                                                                                                           | May 2026 - Present  |
| <ul style="list-style-type: none"><li>Developed an AI-powered College Helpdesk Agent that uses Natural Language Processing (NLP) to automatically answer student queries related to admissions, courses, schedules, and campus services, improving support efficiency and response time.</li></ul>         |                     |
| <b>SigmaGPT (<a href="#">Github</a>)</b>                                                                                                                                                                                                                                                                   | Jan 2026 - Feb 2026 |
| <ul style="list-style-type: none"><li>Built a ChatGPT-like conversational AI platform using React.js, Node.js, Express.js, MongoDB, and OpenAI API. Implemented thread-based chat management, conversation persistence and responsive UI design, enabling seamless AI-powered user interactions.</li></ul> |                     |
| <b>Web Application Security Audit Tool (<a href="#">Github</a>)</b>                                                                                                                                                                                                                                        | Jun 2025 - Aug 2025 |
| <ul style="list-style-type: none"><li>Developed Python-based security automation tools for vulnerability assessment, achieving 95%+ detection accuracy and generating interactive HTML reports with remediation guidance.</li></ul>                                                                        |                     |

## CERTIFICATES

|                                                                              |           |
|------------------------------------------------------------------------------|-----------|
| Certificate on Cybersecurity training - <a href="#">Paloalto Networks</a>    | July 2025 |
| Certificate on AI With Data Analytics - <a href="#">OCTCOMM Technologies</a> | May 2024  |

## CODING PROFILES

[Leetcode](#) : Solved 250 problems, 3 badges

[Codechef](#) : Solved 300 problems, Rating 1380

[GeeksforGeeks](#) : Coding score of 1300
